

# Campaign Against Euro-Federalism

Founding Supporters: **Tony Benn, Austin Mitchell MP, Alan Sapper Gen.Sec. ACCT, Alex Falconer & other MEPs - 20 Fighting Years**

**U**K & EU big money - joined at the hip in the single market - source of 60% of the City's profits. A charter for **subjectation of the UK & Europe to banking & trans-national corporate power.** Entrenched by judicial **free market directives, stability pacts and 'Troika' austerity diktats.** To take-over, price-fix, asset strip, outsource & tax evade at will.

**EU** & NATO joined at the shoulder marshalling 21 of its 27 states.

The **'Nobel Peace Prize winner'** home to 2 nuclear armed submarine fleets and 3 nuclear bomb producers. Italy, Belgium, Germany and Netherlands flying nuclear weapons under US license. UK, German & French **rival industrial-military complexes the 2nd, 3rd & 4th largest world arms exporters** - accounting with Italy & Sweden **for a third of global arms exports.**

**35** yrs of right-wing **'euroscepticism'** .....the road to nowhere!

Endorsed by two Prime Ministers, several national-daily papers, scores of think-tanks and blogs, hundreds of tory MPs **yet failing to win a simple referendum commitment** - let alone a UK exit - **why?**

**A better question would be 'how could it'? Cont..... PTO**

**B**ecause 21C big money **IS megabank & TNC domination** - and can be nothing else! Decimating Britain - **including** the small to medium farmers, manufacturers, contractors & retailers - **of the Tory grass roots!**

Right-wing Euroscepticism serves to:

- Bamboozle the Tory faithful.
- Rally **domestic support for UK conflicts with its Franco/German rivals** - currently fighting to secure the City's post crash access to the single market.
- License a deluge of immigrant, foreigner, benefit scrounger hate-mongering.
- **Will never - UKIP included** - mount a serious challenge **to the core objectives of EU** - of tying Europe's sovereign states to the single market and NATO

## ***A New Direction for Britain***

### **An interventionist Labour Government Must**

- Break the power of the Wall St/City /US & HM Treasury financial complex . Foreclose on the private equity, hedge fund, tax haven economy.
- Take back rail, energy, water, post & telecommunications infrastructure into public ownership as part of a national strategy of re-industrialisation.
- Recover our asset stripped health, education, housing & social services - to rebuild the realm of public care.
- End the UK's aggressive global posture on behalf of the City / Big Oil and arms producers. Scrap Trident, withdraw from EU, NATO and the European Defence Force.
- Work to restore the authority of the UN for equitable conflict resolution and global co-operation.

***The British Labour Movement and its allies  
must champion the fight for a referendum -  
and use it to project the arguments and vision  
of A New Direction for Britain.***
